

HEAVY EP GREASE

Description

Heavy [EP] Grease containing calcium soap and a special rust inhibitor. Smooth buttery texture and shining red in colour.

Customer Benefit

Protect against bearing wear through outstanding film strength under severe conditions of shock loading.

- Resist water wash out from bearing under the most arduous conditions.
- Minimized leakage from bearing at elevated temperatures.
- Provides long services life through high oxidation resistance.
- Resists rusting.

Application

For most automotive grease applications including wheel bearing, ball joints, universal joints, steering linkages and water pumps.

Recommend for industrial applications where the combination of mild dropping points and excellent water resistance.

Properties	Specification	Results
Appearance	-	Tacky
Colour	-	Shinning Red
NLGI classification	-	2.5
Thickener	-	Calcium soap
Base oil	-	Blend mineral oils
Worked penetration	IP50	250 - 265
Dropping point (°C)	IP132	110 min.
